CAPABILITY STATEMENT

2026

ABOUT US

Founded in 1952 and based in Heyfield, Victoria, McInnes Earthmoving is a proudly family-owned and operated civil contracting company. Under the leadership of Malcolm and Andrew McInnes, the business upholds a long-standing commitment to quality workmanship, reliability, and exceptional service – values that have defined the company for over seven decades and continue to drive its reputation across the region.

CORE VALUES

At McInnes Earthmoving, everything we do is guided by three core values:

Safety First – Always

Quality

Respect

Specialising in earthworks and civil construction, we are committed to delivering exceptional outcomes underpinned by an uncompromising focus on safety. Our team operates within a collaborative and respectful culture, fostering a positive working environment. This ensures every project is delivered with precision, professionalism, and genuine care.

McINNES

SENSITIVE ENVIRONMENT EXPERIENCE

McInnes has extensive experience working in sensitive environments and has been recognised for strong environmental controls and initiatives. McInnes are committed to continually improving these practices.

Highly Sensitive Environments Projects

Gippsland Regional Organics Expansion
Southern Clay Borrow Area Management Plan
Protection of Frog Habitats

Tunnel 5 Pipeline Construction
Endangered microbat managements
Design and construction of acoustic barrier to protect nesting microbats during their nesting Period.

VLine Armco Pipe Strengthening

- Protection of Brown toadlet and habitat
- Feedback received from VLine 'good environmental controls, especially the phytoclean protocol, is one of the best ever'

McINNES

INNOTVATIVE CONTROLS

McInnes has extensive experience in high risk work and have developed effective innovative controls on projects throughout the years.

Past Project Innovative Controls

Tunnel 5 Pipeline Works

High Risk due to the steep cliff face and high risk of rock and debris falling
Innovative Controls
Extensive rock scaling
Design of protective cage

VLine Abutment

Innovative Controls
Total surveying equipment used for live monitoring of abutment to monitor stabilisation

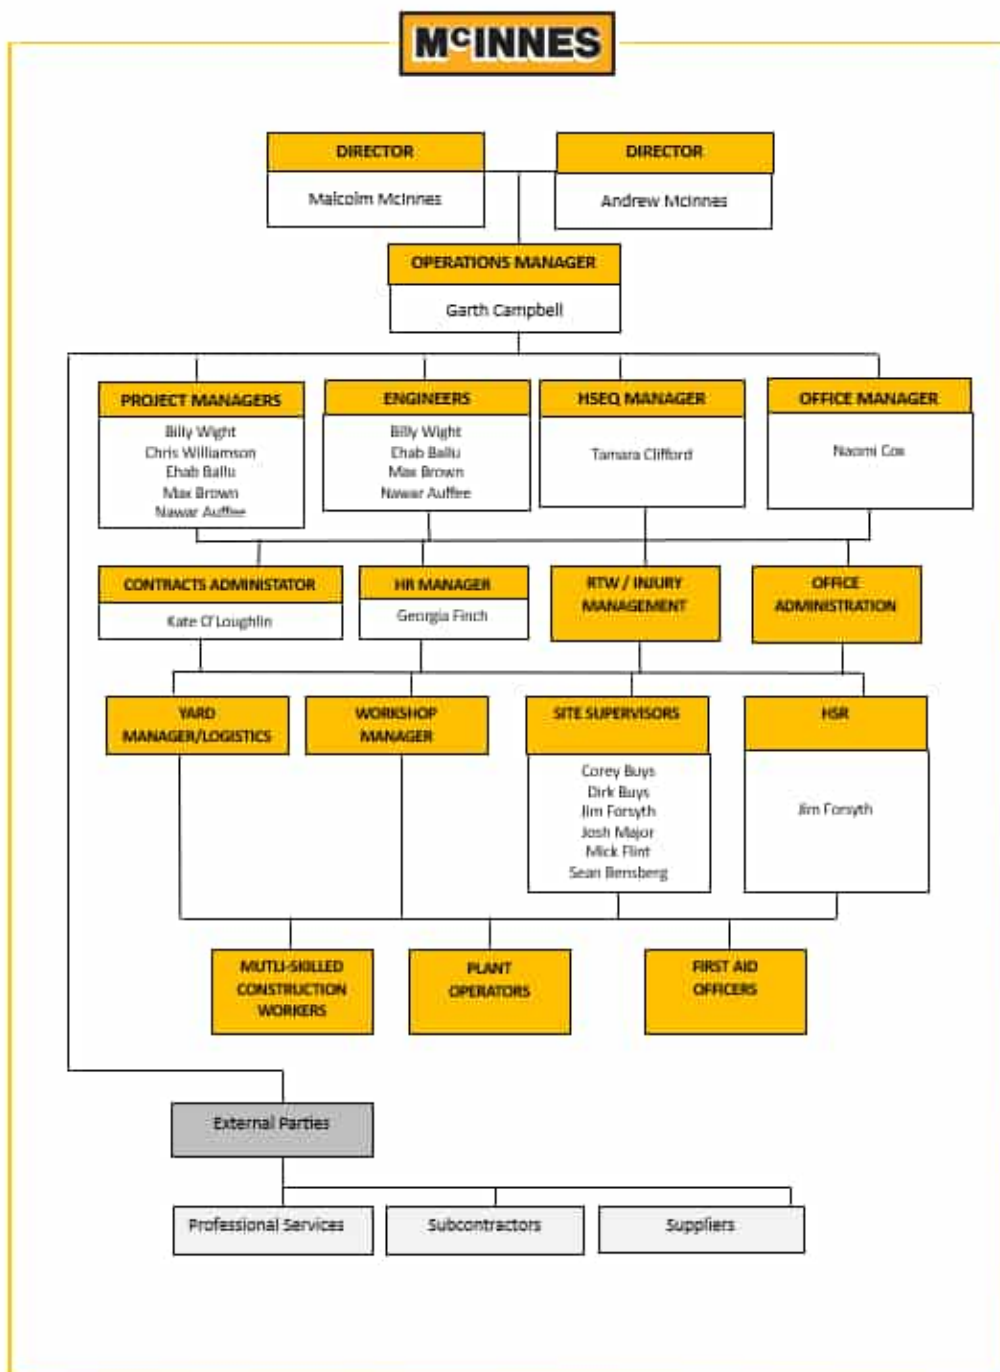

Cape Conran Boat Ramp Extension

25m boat ramp extension in environmentally sensitive coastal area
Innovative Controls

Innovative 'rock bag' cofferdam construction to create a safe working environment for construction workers.
